compass

NEW

The new compass turntable offers a compact entry into the analogue world as a plug-and-play record player.

It features a high-quality bearing and a precision-milled platter. The tonearm „T1“, based on the Satisfy Kardan tonearm, has been reduced to the essentials while still delivering outstanding performance in its price class.

This is further emphasized by a new entry-level MM phono cartridge „N1“.

The design of the compass is top-notch, made from durable quality materials.

If needed, the mounted acrylic dust cover can be easily removed.

Turntables

Celebrity „Al Di Meola“ Edition

With the new Celebrity Series, Clearaudio honors great artists.

This edition is dedicated to the multi-award-winning, US-American jazz guitarist Al Di Meola.

The base unit consists of a high-density fiberboard (black) and is shaped like an electric guitar. It was created in close collaboration with Al Di Meola.

Inside the turntable, you'll find state-of-the-art Clearaudio technology. The platter is driven by a flat belt that passes through the new Tacho-Speed-Control (TSC) system. TSC continuously monitors the platters speed in real-time, allowing immediate adjustments to changing factors such as belt tension or temperature fluctuations. Additionally, TSC performs an automatic speed calibration during each startup. The motor suspension, using multiple O-rings (referred to as IMS-Innovative Motor Suspension), prevents unnecessary vibrations and motor-to-chassis transfers.

This design was adapted from the Clearaudio Reference Jubilee turntable. The new control technology with integrated auto-calibration and additional settings is also applied here. The unique design of the Celebrity turntable combines functionality with aesthetics. The volume control knob, resembling an electric guitar's knob, serves as a multifunctional dial with touch functionality.

With a simple press, you can start the turntable, switch between speeds (33 1/3 and 45 RPM) and put it into standby mode. The outer appearance of the Celebrity turntable is completed by a special version of the Profiler tonearm and a new MM cartridge, also named Celebrity.

The Celebrity turntable is available exclusively in black or wood design (real rosewood veneer). Overall, this package is limited to 1,000 units and includes a specially numbered collector's edition vinyl album by the artist and a guitar plectrum. A true work of art, created by Al Di Meola, Impex Records, and Clearaudio.

Turntables

concept Signature

In 2009, the launch of our concept was a sensation. As an entry-level package with a specially developed tonearm and cartridge, it created a revolutionary sound package with an unbeatable price, design, and performance ratio, and has gained worldwide recognition with over 20,000 units sold.

After more than 10 years of consistency, the concept is getting an update and is now becoming the concept Signature. Consistent research and development of our products have resulted in a new control technology with integrated self-calibration, new adjustment options, and an improved motor suspension („IMS“). Even the shape of the pulley has been optimized for even less wear and more grip.

Like its predecessor, the concept Signature will be available in four chassis colors: silver, black, wood, and darkwood.

Silver chassis

Wood chassis

Power supply: smart power 12V

The smart power 12V is a battery-based DC power supply upgrade designed for Clearaudio's concept and Performance DC turntables. Like the smart power 24V, it provides clean power that is independent of the variability and inherent noise of the mains supply. With a minimal output impedance, it delivers a steady, stable voltage, allowing your concept or Performance DC turntable to maintain perfect speed stability. Available in silver and black aluminium.

Turntables

Power supply: Professional power 12V

The Professional Power is a high quality transformer-based and stabilized power supply for either 12 Volt or 24 Volt DC. It is designed to fill the gap between the standard power supply that comes with our turntables and our state-of-the-art, auto-charging smart power battery supply. The unit's construction features professional-grade electronic components and a resonance-optimized transformer to ensure that no mechanical interference will be transferred through the housing. Available in silver and black aluminium.

Reference Jubilee

40 years Clearaudio - this needs to be celebrated with a special limited turntable (only 250 units)! We created the symbioses of one of the first Clearaudio Reference turntable designs and melting it together with the materials and technology from today, new motor, new resonance technology and super silent motor control board.

The scope of delivery of the Reference Jubilee turntable already includes the new Professional Power 24V power supply unit.

Art. No.	Version			Retail price

Turntables

Master Innovation

Dynamically balanced main platter is a sandwich construction of 70mm (2 ¾ inch) of high-density polymer upon a 15 mm (4/5 inch) precision turned stainless steel subplatter. This floats in free space within the resonance-reducing chassis structure in a Clearaudio patented Ceramic Magnetic Bearing (CMB). Below the CMB is a Clearaudio no-contact drive system derived from the flagship Statement turntable. To allow complete flexibility the Master Innovation will accommodate up to three tonearms (Turntable without tonearm and cartridge).

Tonearms

Unity

NEW

As the name suggests, the new clearaudio tonearm combines the proven single-point bearing with a newly developed magnet stabilization design.

Thanks to this enhancement of the single-point bearing design, new performance standards are set for vinyl playback. All tonearm adjustments are now possible at the micron level, ensuring the most accurate alignment and perfect tracking for high-end cartridge systems.

The continuous height adjustment allows for convenient setup even during playback. This state-of-the-art tonearm will be available in black and silver colors, with a 10 inch Monocouque carbon tonearm tube, making it the perfect complement for all clearaudio products as well as many other manufacturers.

Super Sixstream (1.1m) terminated with RCA.

Goldfinger Statement V2.1

The initial Goldfinger Statement marked a real revolution in the sound of Clearaudio's high-quality moving coil cartridges. We are proud to present the redesigned Goldfinger Statement V2.1 cartridge, which offers significant technological advances for an impressive listening experience.

By integrating stronger magnets and a new selection process, the Goldfinger Statement V2.1 sets new standards in sound quality. Redesigning the needle carrier with an optimized angle helps improve tracking accuracy, which has a positive impact on the overall performance of the cartridge.

MC025/V2.1	14 carat Gold-body			15.000 €

Diamond Jubilee MC

NEW

Stagnation is regression, which is why our team is always searching for new materials and techniques. With the Diamond Jubilee MC, we have succeeded in combining one of the hardest materials in the world with the finest selection of other components such as magnets and coils. In addition, a new needle construction design has been added to set a new standard.

Art. No.	Version			Retail price
MC028				25.000 €

Note:

For a cartridge/stylus exchange Clearaudio request the damaged cartridge to be returned in advance before shipping a replacement.

Otherwise the replacement cartridge will be charged with the original price.

For exchange prices of MC cartridges, see page 38.

smart power 12V

The smart power 12V is a battery-based DC power supply upgrade designed for Clearaudio's concept and Performance DC turntables. Like the smart power 24V, it provides clean power that is independent of the variability and inherent noise of the mains supply. With a minimal output impedance, it delivers a steady, stable voltage, allowing your concept or Performance DC turntable to maintain perfect speed stability. Available in silver and black aluminium.

Professional Power

The Professional Power is a high quality transformer-based and stabilized power supply for either 12 Volt or 24 Volt DC. It is designed to fill the gap between the standard power supply that comes with our turntables and our state-of-the-art, auto-charging smart power battery supply. The unit's construction features professional-grade electronic components and a resonance-optimized transformer to ensure that no mechanical interference will be transferred through the housing. Available in silver and black aluminium.

Terra - Groundbox

NEW

Every device in the household has the potential to introduce interference in the high-frequency range, which can be a potential disruptor for clean music enjoyment. However, often the fault lies within the hi-fi chain itself, which can generate unwanted humming. This is usually due to a missing or incorrect grounding. The new grounding system „Terra“ by Clearaudio is our solution to consolidate all necessary groundings at one point and leave possible ground loops in the past. The star-shaped endpoint prevents any ground loops, and the sand-filled casing additionally protects against vibrations and interference. Through a special grounding plug, the device is grounded via the power outlet but is not directly connected to the electricity.

On the back of the „Terra“ grounding device, there are three connections for direct grounding (grounded) and three connections with potential difference (ground lifted). Additionally, six grounding cables are included in the delivery.

Small device, big impact - with its 91 millimeter diameter, the black or silver anodized housing effortlessly complements the aesthetics of any system.

Art. No.	Version			Retail price
EL040/B	Black			990 €
EL040/S	Silver			990 €

Power terminal

NEW

High-quality power strips are often neglected in hi-fi and home theater systems and electromagnetic and high-frequency disturbances can affect the quality of playback from the very beginning.

Clearaudio offers an all-in-one solution with the Power Terminal. The power strip offers a total of seven slots (1x 100W for turntable motors, 2x 800W for power amplifiers, 2x 200W for analog devices, 2x200W for digital devices), which are also individually grounded in a star shape.

The connection to the power grid is made via a shielded power cable. Thanks to a DC blocker, phase control, surge and lightning protection, your hi-fi system is safely and cleanly supplied with power.

The power strip is offered in black or silver anodized colors and can be mounted either vertically or horizontally (on the wall or the stand of your system).

smart double matrix

NEW

Great performance, compactly implemented. The smart double matrix cleans your most valuable treasures on both sides in just one wash cycle. Inspired by the basic idea of the double matrix professional SONIC, the washing unit enables the cleaning of all record sizes, as the application surface can be adjusted by a controller in the washing unit. Also included in the delivery is a robust clamp with label protection to protect the labels of your records from damage or moisture during cleaning. The application of the cleaning fluid is done at the push of a button, and the duration and intensity of the cleaning are determined by the user themselves using the intuitive buttons. Visually, the new washing machine impresses with its elegance made of black, satin-finished acrylic.

A quite suction turbine inside the simple housing powerfully cleans the record. The new washing machine also contributes to resource efficiency: the production of the storage and collection containers takes place entirely in our own production facilities. For the first time in clearaudio's history, 3D-printed components are incorporated into series production.

With the new smart double matrix, clearaudio deliberately renounced expensive cleaning programs, level indicators and vibration modules during development. Thus, the latest model of the successful clearaudio Matrix Generation aims to make quick and double-sided cleaning affordable for everyone.
